WORK EXPERIENCE

*BlackBusters
Foundation
2023 – 2024*

Voluntary Videographer & Digital Creator

Blackbusters Foundation – Ghana | 2023

- Produced impactful media content to support the foundation's mission of uplifting rural communities in Ghana.
- Created videos to promote fundraising efforts, document outreach activities, and raise awareness on social issues.
- Gained hands-on experience in visual storytelling, editing workflows, and content strategy for non-profit advocacy.

EDUCATION

*UENR
2022 – 2026*

BSc. Information Technology

University of Energy and Natural Resources (Expected 2026)

- Coursework in programming, database management, networking, and software development.
- Developing problem-solving, critical thinking, and teamwork skills through academic projects and coursework.

*NOBISCO
2018 – 2021*

WASSCE – General Arts

Northern School of Business | Completed 2021

- Focused on Economics, Government, and Geography; built strong analytical and communication skills.

PROJECTS

HTML · CSS · JS

Healthcare USSD Simulator & Web Dashboard

Link: <https://callyjoe.github.io/healthcare-ussd-dashboard/>

A web-based platform simulating USSD-style appointment booking and symptom checking on basic mobile phones, paired with an admin dashboard for data visualization.

- Demonstrated UI/UX design, state management, and complex data structure handling.
- Addressed real-world healthcare infrastructure challenges in low-connectivity environments.

HTML · CSS · JS

Digital Asset Manager

Link: <https://callyjoe.github.io/Digital-Asset-Manager/>

A web application for uploading, organizing, and categorizing visual assets with in-browser image manipulation capabilities.

- Built responsive grid layouts and file handling features for managing graphics and design mockups.
- Integrated Canvas/image processing APIs for basic subject isolation and contrast adjustment.

PHP · SQL ·
HTML/CSS

Computing Trends CMS

Link: <https://callyjoe.github.io/Content-Manager-system/>

A dynamic, database-driven blog and resource hub covering modern computing paradigms.

- Built full-stack with PHP and SQL Server — article creation, categorization, and user authentication.
- Designed RESTful API routes and CRUD operations with a clean, professional frontend.

Python · JS ·
HTML/CSS

AI Smart Study Assistant

Link: <https://callyjoe.github.io/AI-studychatbot/>

An AI-powered academic support tool offering interactive study features for students.

- AI chatbot for instant academic Q&A; quiz/exam emulator with auto-marking and timed assessments.
- Document analyzer for PDF/Word/slide uploads; OCR-based handwritten notes-to-text converter.
- Topic-based PDF and YouTube recommendations, flashcard generator, and ambient study music.
